

Paul Giboney Background

I began my experience in agriculture as a field tech for Kern County Coop Extension.

I have BS in Crop Science from Cal Poly

MS in Soil and Water Science at University of AZ in Tucson

I worked in the southern San Joaquin Valley under Dr. Henry Vaux at UCR on an irrigation and energy project administered by the US Salinity Lab.

I conducted field research with various amendments, fertilizers, growth regulators and a nematicide at Brea Ag Service and Unocal Chemicals Division.

I worked with partners and alone in ag consulting including irrigation scheduling and system evaluations

I worked intermittently over many years for the former head hydrologist for the Kern County Water Agency

I have worked the last 25 years as the ranch agronomist PCA at M. Caratan, Inc. a family owned farm, where now we have mostly table grapes and some juice grapes.

For the last few years I have served as the chair of the Environmental Resources Committee of the CA Grape and Tree Fruit League.
